BUILDING YOUR STRATEGY, STEP BY STEP

Optional Strategy Summary Poster
Health System Barriers

Step 1:
After each group has prioritised their barriers, gather as a workshop to identify whether any of these barriers are structural or system-wide challenges that impact most or all communities. These challenges often stem from issues at the healthcare system level, such as a shortage of healthcare workers or limited access to healthcare data.

Step 2:
Use the "Health System Barriers Prompt Card: Why" from Workshop 1 to help you identify if there are health system barriers.

Step 3:
If you identify any health system barriers, write them in the boxes on the left side and tick which category of health system barrier it is. *If there are no health system barriers, leave this poster blank.*

Note:
In Workshop 2, one group will focus on generating solutions for any health system barriers.

Priority Community: ....

1–3 Prioritised Health System Barriers	Health System Barrier Category:			
	◯ **Supply and Cold Chain:** Limited supply of services or vaccines, or problems with keeping vaccines safe during transport (cold chain issues).	◯ **Data Management:** Poor data systems within healthcare systems to track vaccinations or other limitations in the available health surveillance data.	◯ **Healthworker Availability and Quality:** Insufficient numbers of skilled healthcare workers or vaccinators.	◯ **Governance or Policy Issue:** A lack of or poor management of government or wider healthcare policy, impacting governance and the standard of healthcare across sites.
	◯ **Supply and Cold Chain:** Limited supply of services or vaccines, or problems with keeping vaccines safe during transport (cold chain issues).	◯ **Data Management:** Poor data systems within healthcare systems to track vaccinations or other limitations in the available health surveillance data.	◯ **Healthworker Availability and Quality:** Insufficient numbers of skilled healthcare workers or vaccinators.	◯ **Governance or Policy Issue:** A lack of or poor management of government or wider healthcare policy, impacting governance and the standard of healthcare across sites.
